# INFO TECH

GAMING FOR GRADES

Anyone here own a computer? Most of us do, it's just part of our generation. That's what makes Info Tech such a great cluster! These kids know what's up with your computer and how to fix it. Freshmen go into Intro to IT, and the information is so extensive that the whole sophomore year is Info Tech again! From there they chose to study networking or hardware. These kids work very hard on their projects, but if you walk into the IT room on any given day, there's bound to be plenty of people playing video games! Life's all about the fun moments right? It's what high school is made for.
